

AZER SCIENTIFIC

Azer Scientific is proud to introduce its new Teflon™ printed well slides, specially designed for immunofluorescence tests. They are high quality microscope slides coated with a proprietary hydrophobic Teflon™ paint.

Hydrophobic coating:

- Prevents cross-contamination
- Increases well capacity

Perfect wettable surface:

- Enables homogeneous spreading of antigens
- Enhancing cell attachment to the well surface

These high quality slides are complete with 90° polished ground edges and clipped corners.

Available in the following colors:
