

Microscope Cover Glasses

Our microscope cover glasses are made from pure white borosilicate glass of the first hydrolytic class with an excellent chemical resistance and an exceptional flatness. In accordance to DIN ISO 8255-1:2003-05 its refractive index is $n_e=1.525\pm 0.0015$. Under the ultraviolet light of the fluorescence microscopy, our cover glasses do not emit any disturbing self-fluorescence. All cover slips are packaged 1 ounce per box, 10 boxes per case.
