

EverMark Select Microscope Slides

Azer Scientific's Select line of microscope slides are value priced slides made from high quality refined glass. These slides are pre-cleaned with smooth ground edges and undergo superior quality processing. All slides have a single, color frosted end which helps to avoid sticking and jamming problems that may occur with other slides. The color frosted end is resistant to all common chemicals that are utilized in the laboratory. Clipped corner and adhesive slides are also available in a variety of colors. The adhesive slides are prepared with a permanent positive charge which firmly anchors all types of specimens to the slide.
