

AZER SCIENTIFIC

Infrared Microsterilizer

- *Complete Infrared Sterilization in 5-7 Seconds*
- *Safe, Convenient and No Spatter*
- *Ideal for Platinum Loops, Needles and Tube Mouths*

Product Information

Azer Scientific's infrared microsterilizer has an asbestos-free core element that uses infrared heating to produce 815°C (1500°F). It completely sterilizes microorganisms in 5-7 seconds. This microsterilizer uses well-proven technology to provide instant sterilization of platinum inoculation loops, needles, glass tube/pipette mouths and various metal & borosilicate glass instruments. The ceramic heating element is safely enclosed in a perforated stainless steel guard chamber, protecting users from accidental contact with the extreme temperatures of the core area. It is extremely compact, convenient and can be used in anaerobic and aerobic chambers.

Product Specifications

Max Temp	815°C / 1500°F
Sterilization Time	5-7 seconds
Chamber Diameter	0.55 inches / 14mm
Chamber Length	3.94 inches / 100mm
External Dimensions	4 x 6 x 6.5" (10.2 x 15.2 x 16.5)
Weight	2.9 lbs. / 1.3 kg

Replacement Parts Available
Upon Request
