

Introducing our Full Line of Histology Control Slides

Azer Scientific's control slides are carefully prepared with paraffin embedded human tissue sections containing specific characteristics that are used for monitoring staining procedures in pathology laboratories. Each package contains 10 EverMark microscope slides (unless otherwise noted below). One slide is included, stained with the proper procedure to demonstrate and validate the expected result.

Standard Histology Control Slides

Item #	Description
ESCS-102	Control Slide, Acid Fast Bacteria
ESCS-103	Control Slide, Pneumocystis
ESCS-104	Control Slide, Alcian Blue
ESCS-106	Control Slide, Amyloid
ESCS-107	Control Slide, Argentaffin
ESCS-109	Control Slide, Bile
ESCS-110	Control Slide, Calcium
ESCS-111	Control Slide, Elastic Tissue
ESCS-112	Control Slide, Fat
ESCS-113	Control Slide, Fungi-Pas
ESCS-114	Control Slide, Fungi-Gms Silver Strain
ESCS-115	Control Slide, Giemsa

Item #	Description
ESCS-116	Control Slide, Glycogen
ESCS-117	Control Slide, Gram Organism
ESCS-118	Control Slide, Iron
ESCS-120	Control Slide, Luxol Fast Blue
ESCS-121	Control Slide, Massons
ESCS-122	Control Slide, Melanin
ESCS-124	Control Slide, Muci Carmine
ESCS-125	Control Slide, Periodic Acid
ESCS-126	Control Slide, Ptah
ESCS-127	Control Slide, Reticulum
ESCS-129	Control Slide, Trichrome

IHC (Immunohistochemistry) Control Slides

Item #	Description
ESCS-130	Control Slide, Helicobacter
ESCS-170	Control Slide, PIN-4 (10 pos., 10 neg.)
ESCS-171	Control Slide, CMV (Cytomegalovirus)
ESCS-174	Control Slide, PSA (Prostate Specific Antigen)
ESCS-175	Control Slide, ER
ESCS-176	Control Slide, PR
ESCS-177	Control Slide, Her-2Nu
ESCS-178	Control Slide, Ki67
ESCS-179	Control Slide, Normal Cervix
ESCS-180	Control Slide, HPV
