Accuris laboratory balances provide accuracy and precision for researchers who demand results. Three series are available to meet a variety of requirements from basic weighing to advanced analytical measurement.

The Compact and Precision series use Variable Capacitance Technology with gold plated capacitors on a ceramic load cell. This reliable technology delivers accurate readings with high repeatability. The Analytical series of balances incorporate Electromagnetic Force Restoration Technology, to deliver unmatched accuracy down to 0.0001 g . The analytical models are available with internal calibration (optional) and readability down to 0.0001 g . In addition, all Accuris balances feature adjustable leveling feet and leveling bubble indicator.
